

# The Science of Invisibility

## Across

- 3.** The distance from peak to peak.
- 4.** The regular arrangement of atoms in a crystal
- 7.** Electromagnetic radiation

## Down

- 1.** They are usually made of smaller copper structures
- 2.** The bending of light as it passes from one

**8.** Not repetitive

**9.** A type of crystal that breaks known symmetries

medium to another.

**5.** A common material for meta-atoms

**6.** The inverse of period

**7.** It demonstrates how much the electric field is reduced in a material.
